

You cannot watch TV, read a magazine, or visit a bank without seeing something about Identity Theft. It has become the fastest growing crime in America. CBS News reported that every 79 seconds a thief hacks into a computer, steals a victim's identity, and then goes on a buying spree.

What is SecureClean?

SecureClean is a PC disk wiping solution that enables you to remove personal and confidential information from your PC.

Windows® often stores unneeded traces of your personal information, including passwords, credit card numbers, and previously deleted data and email, all without you even knowing it.

SecureClean lets you erase personal information like financial data, user names/passwords, and credit card numbers from your PC. Now you can give away or donate your PC without the fear of anyone being able to recover your personal data from it. What isn't there can't be stolen!

Key Benefits

- Protects your privacy by locating and removing unneeded traces of personal identity information from your PC.
- Protects you by erasing what you can't see – but what the bad guys can! When you delete a file on a PC, it doesn't go away, it's still there – it's just that you can't see it anymore. Even worse, any unscrupulous expert could easily find and access it. SecureClean removes the data for you.
- Protects you by permanently erasing unwanted, previously deleted messages lingering in e-mail archives from popular e-mail programs like America Online®, Microsoft Outlook®, Outlook Express®, Netscape®, and Eudora®.

Personal Security Scanner

- Scan and find traces of personal information left by Windows.
- Verify that your system was fully cleaned.

Easy to Use

- Quickly and easily clean your entire system of old unneeded file data.
- Features a special trash bin located on the desktop for true drag/drop file deletion.
- Designed for both the home and the advanced user.

Automated Cleanings

- Ability to set up daily or weekly automatic cleaning schedules.
- Option to automatically clean at shutdown or log off.
- Does not require a user to be logged in to perform a scheduled cleaning.
- Creates a report of previous cleanings.

System Requirements

- SecureClean 4.0 is designed for Windows 98, Me, 2000, and XP platforms.
- SecureClean 3.0 is available for NT4.0 and Win95.
- SecureClean 4.0 supports hard drives, ZIP, JAZ, diskettes, and multi-media cards.
- Performs 1,3,7,12 level data wipes, and meets US Standard DoD 5220.22-M
